

Health and Safety

“Prepare and prevent, don't repair and repent.”

Author Unknown

Accidents occurring in the workplace cost organizations thousands of dollars. Employers and senior managers can achieve financial returns by adopting health and safety best practices and encouraging employees to be aware of their health and safety responsibilities. Today more and more employers are being found to be liable for accidents and incidents to employees or third parties. Although it is almost impossible to prevent all accidents in the workplace. We can help you manage your health and safety to give you peace of mind, comply with current legislation and help defend claims should they arise. Our consultants will work with you to provide the following:

- Identify hazard and prioritise risks
- Assess risk
- Development of elimination and control strategies
- Accident investigation
- Development of Safety Policies and Procedures
- Workplace Inspections
- Workplace audits
- Monitoring strategies including the revolutionary “How's My” Safety Scheme
- Development of management systems (HSG 65, 18001)
- General and specific training, advice and guidance

Risk Management

In recent years, Risk Management has become fundamental to the practice of planning, management and the operation of a business. Risk Management now underpins international legislation and its various regulations.

Our programs enable persons with related occupations in all industries to assess risk management activities and to provide accurate and appropriate advice. Our consultants will work with you to:

- Train your staff in risk management techniques
- Identify your significant business risks - What negative events could realistically occur within your business
- Analyse your business risks - What impact would those events have on your business in the short medium and long term?
- Develop contingency plans to help minimise the likelihood of those adverse events occurring
- Develop disaster recovery plans to help get you up and running again following an adverse event with minimal disruption
- Work with your risk insurers to help you reduce the premiums paid to them
